

Sanjay Babu Vuddandi

Data Science Graduate Student | Software & Data Enthusiast

+46 0760928058 sanjay8vsk@gmail.com linkedin.com/sanjay8vsk github.com/sanjay8vsk

Professional Summary

Master's student in Data Science with a Computer Science background and hands-on experience in software development, data analytics, and AI-driven applications. Skilled in Python, SQL, React.js, and data visualization with experience building responsive web applications, intelligent systems, and analytics-focused projects. Strong interest in Data Engineering, Software Development, AI systems, and scalable data-driven solutions.

Education

University of Skövde <i>Master's in Data Science</i>	Skövde, Sweden 2025 – Present
Jawaharlal Nehru Technological University Anantapur <i>Bachelor of Technology (B.Tech) in Computer Science</i>	India 2020 – 2024

Technical Skills

Programming Languages	Python, TypeScript, SQL, HTML5, CSS3
Data & Analytics	Pandas, NumPy, Power BI, Excel, Data Visualization, Data Cleaning, Exploratory Data Analysis (EDA)
Software Development	React.js, REST APIs, UI/UX Design, Figma
CLOUD	AWS, Azure
AI & Data Science	LangChain, Prompt Engineering, AI Applications, Machine Learning Fundamentals
Tools & Platforms	Git, GitHub, VS Code, Google Colab, LaTeX
Concepts	ETL Concepts, Data Pipelines, API Integration, Version Control

Experience

Software Engineer Intern <i>Kenexoft Technologies</i>	Hyderabad, India June 2023 - August 2023
- Worked on responsive frontend development for an AI-assisted recruitment platform. - Collaborated on integrating frontend components with backend database systems. - Improved UI responsiveness and overall application usability across devices	

Projects

AI Enabled Recruiting System (AIERS)	<i>JavaScript, HTML, CSS, SQL, Python, Figma</i>
- Developed an AI-assisted recruitment platform with responsive UI/UX design using Figma. - Worked with Python and database systems to support structured data handling and recruitment workflows. - Enhanced application usability, frontend responsiveness, and overall user interaction experience.	
Movie Prediction Data Analysis Project	<i>Python, Pandas, Data Analysis, Machine Learning</i>
- Performed exploratory data analysis and preprocessing on movie-related datasets using Python and Pandas. - Applied machine learning techniques to analyze trends and generate prediction-based insights. - Visualized data patterns and evaluated prediction performance using analytical workflows.	
Music Intelligence Application (Currently Working)	<i>Python, Machine Learning, AI Applications</i>
- Developing an intelligent music analytics application focused on recommendation and prediction workflows. - Working on integrating machine learning concepts and data-driven insights to enhance user experience. - Designing scalable analytical features and intelligent processing pipelines for music-related datasets.	

Certifications

- Microsoft GitHub Foundations
- Microsoft Azure Fundamentals
- Microsoft Certified: Fabric Analytics Engineer Associate

Relevant Coursework

Machine Learning, Data Mining, Artificial Intelligence, Database Systems, Data Visualization, Data Science
